ABOUT ME

Cybersecurity and AI-focused Software Engineer with hands-on experience in network security, vulnerability assessment, security testing, and AI-powered fraud detection. Developed SafeTap, an AI-based application that analyzes suspicious messages, links, QR codes, and calls using machine learning and application development technologies. Experienced in Python, network analysis, security testing tools, and secure software development, with additional industry experience in enterprise application development, API integration, and database management. Seeking opportunities in cybersecurity, security engineering, threat detection, and AI-driven security solutions.

PROFESSIONAL EXPERIENCE

Cyber Security intern | Saudi Constructioneers Ltd. (SAUDICO) | March 2026 – June 2026

- Developed and integrated an internal attendance management system, improving operational efficiency and data accuracy.
- Conducted vulnerability assessment and documented security findings with recommended remediation measures.
- Worked with network security technologies, including IDS, firewalls, Access Control Lists (ACLs), and Site-to-Site VPNs.
- Gained hands-on exposure to network services and protocols, including TCP/IP, DNS, and DHCP.
- Supported secure communication between remote networks through VPN technologies.

Software Engineering intern | Ministry of Education | January 2024 – July 2024

- Designed and developed a web-based platform for managing professional development activities.
- Improved database organization and reporting efficiency through optimized data structures and backend enhancements.
- Supported data organization and reporting processes to improve the availability and accuracy of information for decision-making.
- Worked on system requirements, application development, database-related tasks, and testing within a professional environment

PROJECTS

SafeTap | AI Fraud Detection Application (Solo Project)

- Developed an AI-powered iOS application to assess potentially fraudulent messages, links, QR codes, and calls.
- Integrated a Core ML text-classification model to classify messages as safe, suspicious, or scam.
- Designed explainable risk indicators to help users understand suspicious message characteristics.

Jisr | Community Integration Platform(Team Project) app's link in my portfolio

- Developed an iOS application that helps Saudi scholarship students connect through shared interests and community activities.
- Built an AI-powered recommendation system using OpenAI API, later migrated to Core ML.
- Integrated APIs, Firebase services, authentication, data storage, and an interactive 3D experience.
- Conducted user testing with 30+ participants to evaluate application functionality and recommendation quality.

Board Room | Secure Room Booking System(Team Project)

- Developed a secure application for room booking using SwiftUI, authentication, and REST API integration.
- Implemented input validation and protected API communication following secure software development practices.
- Applied application architecture and debugging practices throughout development.

Cybersecurity Projects — Network Defense & Penetration Testing

SecureLens — Web & API Security Assessment Tool
Developed a Python-based security assessment tool for identifying common web and API security misconfigurations and generating risk-based security reports.

- Performed practical exercises involving network security, vulnerability assessment, penetration testing, and threat analysis.
- Worked with networking and security technologies including TCP/IP, DNS, DHCP, VPN, firewalls, IDS, and ACLs.
- Used tools including Kali Linux, Burp Suite, OWASP ZAP, Wireshark, Nmap, Metasploit, and Splunk

EDUCATION & TRAINING

Full-Stack iOSDeveloper | **Apple Developer Academy at Tuwaiq** | August 2025 – June 2026

Cybersecurity | Academy of Learning | July 2026

Software Engineering | Princess Nourah bint Abdulrahman University | July 2024

SKILLS

Technical Skills

Cybersecurity: Penetration Testing · Vulnerability Assessment · Threat Analysis · Risk Assessment · Network Security · Application Security · Secure Software Development Secure SDLC · Incident Response · Cryptography

Network Security: VPN Fundamentals · Firewalls & ACLs · Network Troubleshooting · Static & Dynamic · RoutingVLANs & Trunking · Routing & Switching · DNS & DHCP IPv4/IPv6 Addressing & Subnetting · TCP/IP & OSI Model · Networking Fundamentals · Cisco Packet Tracer · Cloud Networking Fundamentals

Security Tools: Kali Linux · Metasploit · Burp Suite · OWASP ZAP · Wireshark · Nmap · Splunk · Windows

Cloud & DevOps: DevOps Fundamentals · Cloud Computing · IaaS · PaaS · Saas · Docker · AWS · CI/CD

AI & Machine Learning : Machine Learning · Artificial Intelligence · NLP · Generative AI · Model Development · AI API Integration · Core ML · Create ML · Data Analysis & Preparation · Model Optimization · Large Language Models (LLMs) · Prompt Engineering · AI Application

iOS & Software Engineering : SwiftUI · UIKit · MVVM · MVC · REST APIs · JSON · Core Data· UserDefaults · Firebase · Xcode · Git ·. GitHub · API Integration · Debugging Testing ·Visual Studio Code · OAuth· JWT

programming Languages : python · javascript · java · typeScript · C# · C++ · C · HTML · CSS · PHP · Swift · Kotlin · Flutter · SQL · React · Node.js

Soft Skills : Problem Solving & Analytical Thinking · Teamwork & Communication · Self-Learning & Adaptability · Time Management · Good at presentations · Project Management Professional (PMP) · Emotional intelligence. · Critical Thinking · Trust me. I can make it happen · Attention to Detail · Initiative and Accountability

Core Competencies

Technical Testing & Troubleshooting · Systems & Application Support · Infrastructure Deployment · Database & Data Management · Technical Reporting · Data Collection & Analysis · Network Services · Application Integration · Software Development Lifecycle · Security & Risk Analysis · Problem Solving · Cross-functional Teamwork . Emotional intelligence
