ABOUT ME

Software Engineer who built production-ready applications and AI-powered solutions through industry internships and real-world projects. Experienced in designing, developing, and maintaining scalable software while applying clean architecture, software engineering principles, and modern development practices. Passionate about building high-quality applications that deliver measurable value. Complemented by practical experience in cybersecurity, including secure software development, network security, vulnerability assessment, and penetration testing.

SKILLS

iOS & Software Engineering: SwiftUI · UIKit · MVVM · MVC · REST APIs · JSON · Core Data · UserDefaults · Firebase · Xcode · Git · GitHub · API Integration · Debugging · Testing ·React · Node.js · TypeScript · Full-Stack Development · Backend Development · Frontend Development· AWS · CI/CD · DevOp PostgreSQL · Data Modeling Agile · Scrum SDLC

AI / ML: NLP Text Classification · Trained ML Classification Models · OpenAI API Integration · Core ML & Create ML · Recommendation Systems

Languages & Tools: Java· Python· C# · C++ · C · HTML · CSS · JavaScript · PHP · SQL · Swift · Git & GitHub

Cybersecurity: Penetration Testing · Vulnerability Assessment · Network Security · Application Security · Secure Software Development · Secure SDLC · Threat Analysis · Incident Response · Risk Assessment · Firewall Configuration · IDS · VPN · ACL · TCP/IP · DNS · DHCP · Cryptography

Security Tools: Kali Linux • Metasploit • Burp Suite • OWASP ZAP • Wireshark • Nmap • Splunk

Certifications: Among the most prominent of them Project Management Professional (PMP)

Soft Skills: Problem-Solving & Analytical Thinking · Teamwork & Communication · Self-Learning & Adaptability · Time Management · Presentation Skills

PROFESSIONAL EXPERIENCE

Cyber Security & Software Development Intern | Saudi Constructioneers Ltd. (SAUDICO) | March 2026 – June 2026

- Developed and integrated an attendance management system into the company's internal platform, improving operational efficiency and data accuracy.
- Worked across mobile development, backend integration, and cybersecurity projects within an enterprise environment.

Software Engineering Intern | Ministry of Education | January 2024 – July 2024

- Designed and developed a web-based platform for managing professional development activities.
- Improved database organization and reporting efficiency through optimized data structures and backend enhancements.

EDUCATION & TRAINING

Software Engineering | Princess Nourah bint Abdulrahman University | July 2024

Cybersecurity | Academy of Learning | July 2026

Full-Stack iOS Developer Program | Apple Developer Academy at Tuwaiq | June 2026

PROJECTS

SafeTap | AI Fraud Detection Application (Solo Project)

- A smart app that detects fraudulent calls and messages in real time and explains the risk to the user.
- Developed a real-time fraud detection system using NLP-based machine learning, capable of classifying suspicious calls and messages with explainable risk analysis.

Jisr | Community Integration Platform(Team Project)

- Developed an iOS application that helps Saudi scholarship students connect with others through shared interests and community activities.
- Built an AI-powered recommendation engine using OpenAI API (later migrated to Core ML) and integrated an interactive 3D gamification experience.
- User testing with **30+ participants** showed high engagement and positive feedback on the recommendation experience.

Board Room | Secure Room Booking System(Team Project)

- Developed a secure SwiftUI room booking application with authentication and REST API integration.
- Implemented secure authentication, input validation, and protected API communication following secure coding best practices.

Juthoor | Cultural Heritage Learning Game (Team Project)

- Developed an educational game that promotes Saudi heritage through interactive learning experiences**.**
- Designed engaging gameplay to improve cultural awareness among younger users.
- Tested with approximately **50–100 users**, with participants reporting **high engagement and meaningful learning outcomes**.

PronounceMe | Speech Therapy Support **(Team Project)**

- Developed an iOS application supporting individuals with Speech Sound Disorders (SSD) through interactive speech exercises.
- Designed accessible learning activities to improve pronunciation through continuous practice.

Clue | Decision-Making App **(Team Project)**

- A decision-making app with two modes: Wisely (guided decisions) and Randomly (instant picks) for when you can't decide.
- Tested with approximately 100 users; 90% reported positive feedback on the experience.

Cybersecurity Lab Projects — Network Defense & Penetration Testing

- Conducted penetration testing on web applications using Burp Suite, OWASP ZAP, Metasploit, and Kali Linux.
- Performed vulnerability assessments and documented remediation recommendations following OWASP Top 10.
- Configured firewall rules, ACLs, VPNs, DHCP, and DNS services to build secure enterprise network environments.
- Implemented a Site-to-Site VPN to establish encrypted tunnels between remote networks, ensuring data confidentiality and integrity across the connection.
- Built and managed core network infrastructure (TCP/IP, DHCP, DNS) for reliable IP allocation, domain resolution, and device connectivity across the environment.
